02 March 2005

Mr. Keith Lynch
Product Director
Applegate Manufacturing
1050 Superior Avenue
Chambersburg, Pennsylvania
U.S.A. 17201

Dear Mr. Lynch:

This letter is to indicate that we have sufficient information to confirm that your "Applegate Cellulose Insulation- Type 1" will comply with our requirements for the evaluation of cellulose thermal insulation. Consequently, effective **02 March 2005**, "Applegate Cellulose Insulation- Type 1" has been issued the pre-assigned number, **13181-L**, subject to the following conditions:

- this CCMC pre-assigned number is provided for the specific purpose of providing product to Pare Feu Pro in Canada.
- this CCMC pre-assigned number must not be publicized in any manner other than noted above.
- this CCMC pre-assigned number is valid only for 3 months. This number is conditional upon Applegate Manufacturing supplying CCMC with a mock-up of the bag labels conforming to the CAN/ULC S703 cellulose standard. If the final evaluation has not been completed within that specified time frame, the CCMC number will be withdrawn.
- if any unforeseen or unresolved technical problems arise during the finalization of the evaluation, the CCMC number may be withdrawn.
- this CCMC number will not appear in CCMC's Registry of Product Evaluations until the final evaluation is completed and accepted by you the client.
- copies of the CCMC Report/Listing for Applegate Cellulose Insulation- Type will not be available until the evaluation has been completed and accepted.
- when the final version of the CCMC evaluation is published, the Issue Date on the evaluation will be the date that the pre-assigned number was issued, not the date the evaluation was completed. Consequently, re-evaluation of your product will be due three years from this Issue Date.
